ExpenseTrack

Administrator Guide

Corpay Expense Track Overview

The Corpay Expense Track solution simplifies the process of generating, submitting, and approving expense reports. Designed specifically for use with Corpay Corporate credit cards, Expense Track allows you to manage all your expense reporting online, eliminating the need to keep records of paper receipts, simplifying report submission, and automating policy reinforcement. Furthermore, you can use Expense Track for reimbursable expenses.

Note that Expense Track is not designed to produce payment amounts to Corpay, but rather to automate the input of these expenses into your accounting systems or reimburse amounts to employees. Use Expense Track as your one source for all expense management purposes in your company.

Some key benefits of Expense Track include:

- Alleviating the need to keep record of paper receipts
- An Expense Track mobile app for uploading receipts, entering line items, approving, and **coding expenses (only available for Expense Track Premium)*
- Auto-image matching of receipts to card transactions through use of the mobile app *(only available for Expense Track Premium)*
- Faster reimbursement for reimbursable expenses
- Improved policy enforcement with configurable rule validation
- Configurable approval routing automation
- Ability to access the application from any device with internet connection
- Google maps integration for determining miles travelled and reimbursement due

Note: Expense Track is available in a Basic and Premium package. Some features may not be available depending on the package you have purchased.

ExpenseTrack

Administrator Guide

Basics

Expense Track Process Flow

The Expense Track process follows two paths: reimbursable expenses and Corpay Corporate Mastercard expenses. The diagram below visualizes both paths.

- **Reimbursable Expenses:** Reimbursable expenses are any expenses incurred without a Corpay Corporate credit card that can be reimbursed. These transactions can be captured by entering expense reports and submitting them for approval through automated routing. If approved and reconciled, the transaction will be exported to be processed through the accounting system.
- **Corpay Corporate Mastercard:** All transactions performed with a Corpay Corporate Mastercard automatically import into Expense Track for processing. From here, you can edit the report as needed and send it for approval and reconciliation. If approved and reconciled, the expense returns to your company's accounting software system.

ExpenseTrack

Administrator Guide

Understand Expense Track User Roles

It is important to understand that there are no specific user roles in Expense Track as the system is heavily permissions based. Each feature has an associated permission that must be granted to an individual user or user group, otherwise it is not accessible.

Administrators will typically have access to all features within Expense Track while users can be granted access to a wide number of features, depending on what the Administrator deems their responsibilities. For example, if an Administrator needs an Accounts Payable associate to reconcile expenses, they would set them up as a user and grant their user profile permission to access only expense reconciliation features. Furthermore, if an Administrator needs several Accounts Payable associates to review expense reports, they can set up a user group with permissions to expense reconciliation features. Then, they can assign each associate to that user group.

To break it down further, see below for a high-level understanding of Administrator responsibilities versus some of the responsibilities that can be assigned to users.

| Administrator | User |
|--|--|
| Set up Users and User Groups | Create Expense Reports |
| Set up Expense Types and Items | Approve Expense Reports |
| Grant Permissions | Reconcile Expense Reports |
| Run Reports | Access Tools such as the Expense Dashboard, Itineraries, and Mileage Calculation |
| Create and Schedule Reports | Use the mobile app for receipt capture, expense reporting, and approvals |
| Configure System Settings | Substitute Approvers |
| Manage User Access | Split Account Coding |
| Build Approval and Reconciliation Workflow | |
| Export Expense Data to Accounting Systems | |

This is just a sample of some of the responsibilities between Administrators and users. Continue reading the guide for in-depth information.

ExpenseTrack

Administrator Guide

Technical and System Requirements

See the following system requirements to take full advantage of the Expense Track website.

Preferred Browsers

For optimal experience, please use the following browsers:

| Browser | Version | Comments |
|-------------------|---------------------|---|
| Internet Explorer | 11.0 | If using Internet Explorer, we recommend using the latest version (11.0) for the best possible experience. Make sure to install all recommended Microsoft software updates. |
| Mozilla Firefox | Most recent version | Coripay makes every effort to test and support the most recent versions of Mozilla Firefox. |
| Google Chrome | Most recent version | Google Chrome automatically applies updates. Coripay makes every effort to test and support the most recent versions of Google Chrome. |

Screen Resolution Recommendations

Expense Track is designed to be responsive with most screen resolutions. Expense Track is thoroughly tested using a combination of browsers and multiple screen resolutions in order to provide users the best possible experience. The following screen resolutions are recommended:

| Screen Resolutions in Pixels | |
|------------------------------|-------------|
| 1024 x 768 | 1366 x 768 |
| 1280 x 800 | 1600 x 900 |
| 1280 x 1024 | 1920 x 1080 |
| 1920 x 1200 | |

Note: A minimum screen resolution of 1024 x 768 is recommended. Screen resolutions smaller than 1024 x 768 might not properly display certain Expense Track pages. Also note, for all browser, you must enable JavaScript and cookies.

ExpenseTrack

Administrator Guide

Other Technical Requirements

| Area | Version |
|--------------------|----------------------------------|
| Adobe Flash Player | 11.0, 12.0, 13.0, 14.1, or later |
| Adobe Reader | 10.0, 11.0, or later |
| Microsoft Excel | 2003, 2007, 2010, 2013, 2016 |

Maintenance Schedule

Expense Track is available a minimum of 99.5% of the time, excluding regular scheduled maintenance. See below for details on Expense Track maintenance releases:

- **Major Releases:** Major releases to Expense Track (example: 12.0, 14.0, etc.) occur annually (summer/fall) and include significant feature and functionality advances such as new user interface designs, extensive workflow improvements, and new modules or product offerings. Each time a major release is ready to deploy, Expense Track administrators will receive an email notification along with a release notes document detailing each change in the release. The release notes and comprehensive user and administrator guides are updated with each release and made available via the Help option in Expense Track.
- **Minor Releases:** Minor releases to Expense Track (examples: 12.4, 14.1, etc.) occur every 2-3 months after a major release and include feature or functionality enhancements along with defect fixes. Each time a minor release is ready to deploy, Expense Track administrators will receive an email notification along with a release notes document detailing each change in the release. The release notes and comprehensive user and administrator guides are updated with each release and made available via the Help option in Expense Track.
- **Maintenance Packs:** Maintenance packs are groupings of critical and high priority patches that are released every 3 weeks on a Monday.
- **Patches:** In rare instances, a critical patch may need to be deployed outside of the releases mentioned above.

ExpenseTrack

Administrator Guide

Note: Releases to Expense Track occur during a scheduled maintenance window of 12:00am - 4:00am EST/EDT.

Navigate Expense Track

Log In

As an Administrator, you will receive your login credentials and the Expense Track URL through email from Corpay. Once you receive your login credentials, follow the steps below to successfully log in and navigate the Expense Track web portal.

1. Launch your web browser (Expense Track is most compatible with Internet Explorer v10 or higher, Chrome, and Mozilla Firefox).
2. Enter the Expense Track URL (expensetrack.com) in your browser's address bar and then press **Enter** on your keyboard.
3. Enter your login credentials (username and password) and then click **Log In**.

ExpenseTrack

Administrator Guide

If accessing the web site via mobile browser, the page will open to the full site login page.

Note: If you fail to log in after four attempts, the web portal will lock you out. However, you can regain access through one of the following methods:

- Wait 15 minutes and you can make another attempt.
- Clear your browser's cache.
- If you are using the Google Chrome web browser, use "Incognito Mode" located under Chrome's tools drop-down menu.
- Click **Forgot Password** to request a temporary password. You will need to change the temporary password upon logging in.

ExpenseTrack

Administrator Guide

Navigate the Expense Track Home Page

The Expense Track home page contains quick access to key features, such as your expense reports, open tasks, and statuses of expenses. It is important to note that the image below is from an Administrator view. It is noted in the table below which features are available for Administrators only.

Note: Expense Track times out after 20 minutes of inactivity. You will receive a 5-minute warning before the system completely logs you out.

The screenshot shows the ExpenseTrack home page with the following numbered features:

1. Main Menu: The top navigation bar with links to Travel & Expense, Reports, Spend Manager, and Settings.
2. Quick Access Carousel: A horizontal bar with three items: All Transactions, Receipts, and Expense Report.
3. All Transactions: A card showing 0 transactions require your attention, with 0 for approval, 0 for account coding, and 0 for receipts.
4. User Logins in Past 6 months: A line graph showing user logins from Jan/20 to Jun/20. The data points are approximately: Jan/20 (7), Feb/20 (7), Mar/20 (6), Apr/20 (2), May/20 (8), Jun/20 (5).
5. Tasks: A card showing 10 expense reports to be reconciled under the Accounting section.
6. Status: A card showing 1049 items in Expense Bin/Drafts and 1 expense report in approval.

| Section | Description |
|--------------------------|--|
| 1. Main Menu | Contains drop-down menus to all of Expense Track's features. |
| 2. Quick Access Carousel | Provides quick access to your draft expense reports. |
| 3. Receipts | Allows you to view all unassigned receipts. |

ExpenseTrack

Administrator Guide

| Section | Description |
|------------------|--|
| 4. Tasks | Displays your open items, such as unreconciled expenses or items that require your approval. |
| 5. Status | Displays the status of your opened expenses. For example, if you have expense reports that require approval, "Expense Reports in Approval" displays with the total number. |

Navigate the Main Menu

The Expense Track main menu contains links to all the features you will use in Expense Track

| Menu | Description |
|---|--|
| Home  | Returns you to the Expense Track home page from any page in the web portal. |
| Travel & Expenses | The Travel & Expenses drop-down contains three groups of links: <ul style="list-style-type: none">Manage/Search: Expense Dashboard, Expense Drafts, Search Expenses, My Cards, Manage Card Service Requests, Expense Import Summary by Batch, Expense Import Summary by UserFilters: Open Expenses, Old Expenses, All ExpensesApproval/Reconcile: Pending Approvals, Approval History, Pending Reconciliation, Reconciled Expenses, Card Service Request Approvals |
| Spend Manager | Provides access to Ad-Hoc Reporting where you can run standard, preformatted reports. |

ExpenseTrack

Administrator Guide

| Menu | Description |
|--|---|
| Settings Icon | Offers access to all Admin-level tools. |
| Speed Links  | Offers the ability to save quick links for your frequently used features. For example, if you want quick access to the Expense Dashboard, type it in the field and click Add . A quick link will be created to the Expense Dashboard that you can access from any page in Expense Track. |
| Messages  | Displays all system- and user-generated notifications. |
| My Cards  | Displays only if a Corpay Corporate Mastercard is assigned to you. Click My Cards to view your card's balance, pending and declined transactions, or request a credit limit increase or replacement card. |
| User Name Drop-down Menu | Provides access to details on the version of Expense Track, your user profile, a Help option, and the ability to set your in and out of office status. |

Administrator Tasks

As an Expense Track Administrator, you are responsible for setting up and configuring Expense Track to be used by your company. This includes several tasks such as setting up expense types, expense items, approval rules, adding and managing users, applying permissions to users, and customizing coding types and field labels. In addition, you can monitor and manage your user's activity within the site by viewing expense report drafts and approving and/or reconciling submitted expense reports.

Although you can set up other users with your same Administrator access privileges, it is recommended Admin-level permissions be limited. This section explains and demonstrates how to configure Expense Track for your company's expense reporting needs and manage the system on an ongoing basis.

ExpenseTrack

Administrator Guide

- [Manage Expense Track](#)
- [Run Reports](#)

Set up Expense Track

Before your company can utilize Expense Track, you are required to complete certain set up procedures. This involves, but is not limited to, setting up individual users and granting them access to different features in Expense Track. Use these set up tasks to customize Expense Track to meet your company's expense reporting standards and so that your users can navigate and perform actions in the system with no issue.

See below for a list of setup-related tasks:

- [Set up Users](#)
- [Set up User Groups](#)
- [Set up Permissions](#)
- [Set up Expense Types](#)
- [Set up Item Categories](#)
- [Define Expense Items](#)
- [Set up Expense Itemizations](#)
- [Set up Credit Card Imports](#)
- [Set up Account Codes](#)
- [Set up Self-Service Card Management](#)

Set up Users

Each employee in your company that will use Expense Track must be set up as a user. This includes all of their attributes such as their login credentials and contact information. Follow the steps below to set up individual users.

Add Users

1. On the Expense Track main menu, select the **Settings icon ()** > **Users** > **Users**.

2. On the Users page, click the **+** symbol.

ExpenseTrack

Administrator Guide

3. Complete each field as necessary. Required fields are denoted by an asterisk. Click **Add User** when finished to set up the user's profile. See field descriptions on the next page.

ExpenseTrack

Administrator Guide

Other Users Page Features

The Users page offers many other features for managing users. Select a user from the User's List and then select one of the following options. If you have a large list of users, use the **Filter** drop-down to filter the list by enabled or disabled users or a user group. Users can also be imported if you have several that need to be created at one time.

The screenshot shows the 'Manage Users' page. At the top, there is a search bar with placeholder text 'Enter First Name, Last Name, or User ID' and a magnifying glass icon. Below the search bar is a toolbar with icons for creating a new user, deleting, and more actions. The main area is a table titled 'Users' with columns: User ID, First Name, Last Name, Display Name, Login Name, Ship To Location, Modules, Employee ID, Manager (with a dropdown arrow), External Reference ID, and Accounting Group. A dropdown menu is open over the 'Manager' column for a selected user, listing various actions: Attributes, Disable, Enable, Copy User, Grant Access, Remove Access, Generate Token, Set In/Out Status, Substitute Approval Routes, Reset Password, and Generate Registration Key.

| Function | Description |
|-----------------------|--|
| Attributes | View the user's profile and make changes to their password or contact information. |
| Disable | Disable the user's account, preventing them from logging into Expense Track. |
| Enable | Enable a disabled user's account, allowing them to log in to Expense Track. |
| Copy User | Copy an existing user's profile to create a new user. |
| Grant Access | Grant the user access to the module selected in the Available Modules drop-down (only Expense is available for Expense Track). |
| Remove Access | Remove the user's access from the selected module in the Available Modules drop-down (only Expense is available for Expense Track). This option would prevent the user from logging into Expense Track. |
| Generate Token | N/A |

ExpenseTrack

Administrator Guide

| Function | Description |
|-----------------------------------|--|
| Set In/Out Status | Set the user's In Office and Out of Office status. If Out of Office, you can specify the amount of time they will be out, return date, and a substitute to perform their duties. |
| Substitute Approval Routes | Select a substitute expense Approver if the user's initial Approver (manager) is not available. |
| Reset Password | Generate and email a random password to the user. |
| Generate Registration Key | Allows you to create a registration key that lets users self-register. If you select this option, you or another Administrative user will need to approve the request through the Users Pending Approval page (Settings icon > Users > Users Pending Approval). |

Set up User Groups

User groups are similar to a user role where permissions and accesses can be assigned to a group and any user added to the group will inherit those permissions.

Define

as many user groups as necessary and customize them to your liking. For example, if you have several users that are responsible for approving expenses, you can create a group titled Expense Approvers. Some standard groups include Cardholder, Approver, Coder, and Administrator. However, you can customize the names and tasks of groups to your discretion. Follow the steps below to add user groups.

ExpenseTrack

Administrator Guide

Add User Groups

1. On the Expense Track main menu, select the **Settings icon (⚙)** > **Users > Groups**.

2. On the User Groups page, click **Add**.

A screenshot of the 'Groups List' page. The page has a header 'Groups List' and a search bar with 'Filter' and 'Keywords' fields, and a 'Submit' button. To the right of the search bar is a vertical list of actions: 'Add' (highlighted with a dark purple background and a red arrow pointing to it), 'Edit', 'Delete', 'Spend Limits', and 'Reset'. The main area of the page is currently empty, showing a large white space.

ExpenseTrack

Administrator Guide

3. On the Add Group page, complete each field with the attributes of the user group. Required fields are denoted by an asterisk. Click **Add Group** when finished. The new user group will display on the previous page.

Add Group

| | |
|---------------------------------------|---|
| Group name * | <input type="text"/> |
| Group description | <input type="text"/> |
| Group email | <input type="text"/> |
| Add group to self-registered users | <input type="radio"/> Yes <input checked="" type="radio"/> No |
| Add members | <input type="text"/> |
| Add Group Clear Entries | |

| Field Name | Description |
|--------------------------|---|
| Group Name | Enter the User Group's full name as it will display in the web portal. Example: Expense Approvers, Executive Administrators, etc. It is recommended the group name be prefixed with a special character, such as an asterisk (*). This practice keeps the user groups arranged together in drop-downs and distinguishes them from user names. |
| Group Description | Enter a description of the user group. For example, if the user group name is Expense Approver, the description could be, "users are allowed to only review and approve expenses". |
| Group e-mail | Enter an email address that can be used for all members (users) in the User Group. |
| Add Members | Add existing users to the user group. If you don't know the user's name, use the Look Up icon to search for them. |

ExpenseTrack

Administrator Guide

Other User Groups Page Features

The User Groups page offers other features for managing user groups. Select a user group from the Groups List and then click one of the following options. If you have a large list of user groups, use the **Filter** field to quickly search for them.

| Function | Description |
|---------------------|---|
| Edit | Edit details on an existing group, such as the group name, description, email, and members (users). |
| Delete | Permanently delete the group. If any users are added to the group, they will lose all accesses and permissions associated to the group. |
| Spend Limits | Set up or change spending limits. Accounting codes must be set up to use this feature. |
| Reset | Clears all details on the user group. |

ExpenseTrack

Administrator Guide

Set up User Permissions

Permissions allow users and user groups to access different features and perform certain tasks within Expense Track. For example, if you want to grant an Expense Approver user group access to run reports, you would select permission **23 - Run Reports**. Follow the steps below to assign permissions to users and user groups.

Note: It is recommended to set permissions at the user group level. If you apply permissions to a user group, each user assigned to that group will inherit those permissions.

Assign Permissions

1. On the Expense Track main menu, select the **Settings icon (⚙️)** > **Users** > **Permissions**.

ExpenseTrack

Administrator Guide

2. This opens the Manage User/Group Permissions page. At the top of the page, select the **User/Group** drop-down to choose a user or a user group. Select the **Permissions Groups** drop-down to choose a permission group and then click **Retrieve Permissions**.

Note: When you first access the Manage User/Group Permissions page, the **User/Group** drop-down defaults to users and groups that begin with "A". Click the **All** button at the top of the page to fill the **User/Group** drop-down with all users and user groups.

Manage User/Group Permissions:

| | | |
|--------------------------|--|---|
| <input type="text"/> | Filter | All A B C D E F G H I J K L M N O P Q R S T U V W X Y Z |
| User/Group * | <input type="button" value="-- Please select user/group from this list --"/> | |
| Permission Groups | <input type="button" value="General"/> | |
| View User Profile | Select permissions and click the Save Permissions Button | Retrieve Permissions |
| View Profile | Save Permissions | Clear All |
| | | Retrieve Permissions |

Note that permissions are separated into the 10 groups, but only the following are valid for Expense Track: General, Base Data, Approval, Travel and Expense, and Security. Review the permissions in each group to see which ones to apply to your users or user groups.

Note: If you are setting up another Administrator user, ensure all permissions under Travel and Expense are selected except permission **2011 - Restrict to Own Expenses**.

3. The permissions for your selected permission group display and each permission assigned to your selected user or user group will be checked. If your selected user is assigned to a user group, the word "Inherited" displays next to each of the user group's permissions.

ExpenseTrack

Administrator Guide

Select the check box next to each permission to apply it to the selected user or user group. Then, click **Save Permissions**. Continue this process for as many users or user groups as necessary. Click **Clear All** to uncheck all selected check boxes.

Note: If you change a user's permissions, they must log out and log back into Expense Track for the changes to take effect.

Set up Expense Types

The information defined for the expense type determines the fields that are available when creating an expense line item. At least one expense type must be defined before moving ahead in the Travel & Expense setup process. Expense types also enable categorization of expense items when they are requested. Expense items are linked to the expense types. Multiple expense items can be associated with an expense type. Expense Types can also be imported when you have several to add at once. Follow the steps below to add expense types.

ExpenseTrack

Administrator Guide

Add Expense Types

1. On the Expense Track main menu, select the Settings icon (⚙️) > Expense > Expense Types.

2. On the Expense Types page, click **Add**.

The screenshot shows a list of expense types on the left side of the screen. The list includes: 115 Advertising & Marketing (), 109 Airfare (), 118 Association Fees (), 290 Building Maintenance - Other (), 291 Communications (), 119 Company Functions (), 136 Employee Personal Purchase (), 137 Fleetcor Intercompany (), 110 Hotel (), 292 Legal - General Expense (), 114 Meals & Entertainment (), 293 Meeting Rooms (), and 112 Mileage (). On the right side, there is a vertical stack of four buttons: 'Add' (dark purple), 'Edit' (dark purple), 'Delete' (dark purple), and 'Reset' (light gray). A red arrow points from the 'Add' button in the list to the 'Add' button in the stack of buttons.

ExpenseTrack

Administrator Guide

3. Complete all necessary fields on the Add/Edit Expense Type page. Required fields are denoted by an asterisk. Each field completed on this page will display on the Create an Expense Report page. Click **Add/Edit Expense Type** when finish.

Note: Require from City and Require to City default to **No** if **Mileage** is set to **Yes/Yes and Calculate**.

Set up Item Categories

Item Categories enable expense items to be grouped together. Numerous Expense Track features are based on these categorizations. Item categories are required when adding items to the catalog. Item Categories are necessary for three reasons:

- **Accounting:** If there are items that have different general ledger accounts, they should be separated and the appropriate accounting code assigned.
- **Control:** If control over what parts of the catalog, users or groups of users can see, then they can be separated into separate categories and create rules to exclude them from users. This may create a situation where multiple categories carry the same accounting code, and this is completely acceptable.
- **Reporting:** If people monitoring item usage have specific reporting needs, then categories can accommodate the views they require. Again, this may duplicate accounting codes. It may also require additional rules to be created to control proper access to items in the catalog.

Follow the steps below to set up item categories.

1. On the Expense Track main menu, select the **Settings icon** () > **Catalog > Item Categories**.

ExpenseTrack

Administrator Guide

2. On the Item Categories page, click **Add**. If you want to edit an existing item category, select it from the Category List and then click **Edit**.

Note: The number in the brackets is the accounting code and the number in the parenthesis is the category ID assigned by the system.

ExpenseTrack

Administrator Guide

Set up Category Accounts

Category accounts provide the ability to assign more than one account code per category. This could be necessary if multiple codes can be assigned to one item category based on the user (specifically based on the location of the user). This might be the case if there is a “generic” category code if they are buying a product for a corporate location and a different account code when they are buying that item for another location.

This is used during the creation of a request if the user logged in has the selected location as their ship-to location in their user profile. When this user creates a request, the “default” account code in the category profile is not used when that user orders an item from the selected category. Instead, the code specified below is used. For example, Laura in San Francisco orders a pen that is for the category “Office Supplies.” The account code assigned to that category for that location is displayed (for example, SanFran2222). However, if a user from a location other than San Francisco orders this pen, then Expense Track uses the default category code (for example, O341).

1. Select an item category from the Category List. Then, click the **Category Accounts** button.

The screenshot shows the 'Category List' page. At the top, there is a navigation bar with letters A through S and a 'Filter' input field with 'Keywords' placeholder text, followed by a 'Submit' button. Below this is a table of categories. A red box highlights the first few categories in the list: 'Advertising & Marketing [76720](14607)', 'Agent Fee [70309](14881)', 'Airfare [70309](14608)', 'Building Maintenance - Other [61609](14834)', 'Car Rental [70309](14609)', 'Collateral/Promotional Items [78402](14610)', 'Communications - Internet, Etc. [55155](14835)', 'Communications - IT Web Access [55152](14836)', 'Communications - Mobile Devices [55157](14837)', 'Company Event [88712](14611)', and 'Contributions [88715](14829)'. To the right of the list is a sidebar with buttons for 'Add', 'Edit', 'Delete', 'Category Accounts' (which is highlighted with a red box and has a red arrow pointing to it), and 'Reset'.

Define Expense Items

Expense items must be created for every individual expense type that will be requested. Each item is linked to an expense type that further specifies the expense item for reporting and coding purposes. Expense items can be imported to Expense Track if you have several to add at once. Follow the steps below to add expense items.

- [Add Expense Item](#)
- [Create Default Expense Item](#)

Add Expense Items

1. On the Expense Track main menu, select the **Settings icon (⚙)** > **Catalog > Items**.

ExpenseTrack

Administrator Guide

2. On the Items page, click **Add Expense Item**.

Note: The **Add** button is not used to enter expense items. You must select **Add Expense Item**.

ExpenseTrack

Administrator Guide

| Field | Description |
|-------------------------------|---|
| Item Name | The expense item's name which will display on the Create Expense Report page. |
| Item Description | Description of the expense item. |
| Account Code | Value used for default coding on expenses (example: 1001-7520-1115). |
| Accounts Coding Type | Select a default accounts coding type for this expense item. When selected, the accounts coding on this expense item will default to your selected accounts coding type (including credit card imports). This setting ignores any accounts coding type defaults set at the global or expense type level. Note: This field displays only if Split Entry Field Format is selected for system setting 829 - Accounting Code Selection Type . |
| Item Category | Select the item category that best specifies the expense item. |
| Expense Type | Select the expense type that is assigned to the expense item. |
| Max Allowed Amount | Enter the maximum amount in dollars that your company allows for approval. If you enter a value greater than 0 and a user adds an expense greater than your amount, the system will behave as defined in the Select Approval Option field. Note: If the Allow Amount Edit field on the Add/Edit Expense Type page is set to No , the Max Allowed Amount is the reimbursable amount. Also note that if you are setting up a mileage expense item, use this field to enter your reimbursable mileage rate (example: 0.54). |
| Select Approval Option | Choose one of the following approval options: <ul style="list-style-type: none">• Decline – All expense reports created that are over the maximum allowed amount are automatically declined.• Route to Manager – All expense reports that are over the maximum allowed amount are routed for approval to the requestor's manager. Select this option if there is no approval rule setup for users in normal expense conditions.• Reimburse to Max Amount – All expense reports that are created and are over the maximum allowed amount will be set to reimburse the maximum amount only. The Approver can change the reimbursement amount if necessary. |

ExpenseTrack

Administrator Guide

| Field | Description |
|-------------------------------------|---|
| Require Receipt above | Enter the amount in dollars that is allowed before an expense report needs to be manually reviewed and reconciled so it can be released for payment. The system can be set up so that all expenses are matched with a receipt. To do this manually, set this field to a very low value. Example: 0.01 |
| Reimbursable | Yes: The amount will allow entry and reimbursement of the amount entered. Ensure this field is always set to Yes , otherwise credit card transactions will auto-approve at \$0.00. |
| Require Vendor Selection | No: User is not required to select a vendor during expense report creation Note: This field should always be No . |
| Expense Advance Type | No Advance: No advance is allowed for this expense item. Advance Only: Select this option only if an advance can be claimed for this expense item. |
| Customer Field Label 1-3 | Used to label custom fields for capturing any additional information. |
| Merchant Category Code (MCC) | Restrict the expense item to one or more MCCs using the Look Up icon Note: MCCs are pre-loaded into Expense Track during account implementation. When expense items are associated with MCCs, the credit card transactions are automatically associated with that item when it is imported into the system. Each MCC can be mapped to multiple expense items. When an item is imported that has multiple MCCs, the transaction defaults to the first item. |

Create a Default Expense Item

As you add expense items, ensure you create a default expense item. Default expense items are items that imported credit card transactions will match to if the import map fails. Once the transaction enters the system, it will display on an expense report in red flag status (⚠) and with no editing options. The user will need to only select the correct expense item to fix the transaction.

ExpenseTrack

Administrator Guide

Ensure the default expense item has a name that is different from your other expense items. An example name of a default expense item may be "Select Expense Item", "Default Expense Item", or "Unmatched Expense Item". For more information, see the topic [Correct Unmatched Credit Card Transactions](#).

Set up Expense Itemizations

Expense itemizations enable you to further break down an expense item into itemized details. For example, a lodging expense item can be further broken down into room rates, taxes, entertainment, etc. Follow these steps to add expense itemization fields.

Note: Expense itemizations are only valid for reimbursable out of pocket expenses as credit card transactions display this information in the associated level 3 transaction data.

Add Expense Itemizations

1. On the Expense Track main menu, select the **Settings icon (⚙️)** > **Expense** > **Expense Itemizations**.

ExpenseTrack

Administrator Guide

2. On the Expense Itemizations page, click **Add**.

Expense Itemization Field List

Setting up Credit Card Imports

Expense Track offers the ability to set up how and when credit card data imports into the website. This can be done under **Settings icon () > System > System Settings.**

Credit Card Import

- **Automatic Receipt Matching (2300):** Use this setting to enable or disable automatic receipt matching for a tenant. When enabled, the system automatically associates uploaded receipts to expense line items if the amount and date match. Automatic matching is triggered when level 3 credit card transactions are imported into the system, a user uploads a receipt, or a user views expense line information. Automatic matching increases the speed in which expense drafts requiring receipts can be created, approved, and reconciled.
- **Number of days before Receipt Reminder is sent (2301):** This setting determines how many days a receipt can exist in the system without being matched to an expense line before a notification is sent to the user. For tenants with automatic receipt matching enabled, the notification alerts users when an uploaded receipt cannot be matched and must be manually associated with an expense line item. For tenants without automatic receipt matching, the notification is triggered for all receipts that are not associated to an expense line item. This tool helps ensure that all receipts are properly associated with expense items, making approval and reconciliation more efficient.

ExpenseTrack

Administrator Guide

- **Draft Naming Convention (2305):** This setting determines how the system names expense drafts generated for imported credit card expenses. The expense draft name decides which information is most readily visible to expense draft viewers and approvers. Some users may prefer to see the credit card name, some the expense period, and some the associated user's name.
- **Credit Card Expense Report Cycle Frequency (2310):** This setting determines how often the system generates new expense drafts for imported credit card expenses. Some businesses track credit card expenses at different frequencies, such as weekly, twice a month, or monthly. Generating new expense drafts that match these processes allows for more efficient expense tracking and approval.
- **First Day of Week for Expense Report Cycle (2311):** Determines the day of the week on which the credit card expense report cycle begins for weekly expense draft creation. Only used if system setting 2310 - Credit Card Expense Report Cycle Frequency is set to Weekly.
- **Day of Month for First Credit Card Expense Report Cycle (2312):** Determines the day of the month on which the billing cycle begins for monthly or semi- monthly expense draft creation. Only used if system setting 2310 - Credit Card Expense Report Cycle Frequency is set to Monthly or Semimonthly. If billing cycle is semimonthly, this setting sets the day for the first billing cycle of the month. Allows the user to customize the expense draft creation to match their monthly or semimonthly expense tracking.
- **Day of Month for Second Credit Card Expense Report Cycle (2313):** Determines the day of the month on which the second credit card expense cycle begins for semimonthly expense draft creation. Only used if system setting 2310 - Credit Card Expense Report Cycle Frequency is set to Semimonthly. This setting must be greater than the value set in system setting 2312 - Day of month for First

ExpenseTrack

Administrator Guide

Credit Card Expense Report Cycle.

- **Default Expense Item for Unmatched CC Transactions (2320):** Allows you to enter a default expense item for unmatched credit card transactions. Ensure the default expense item has been set up before assigning it. Do not assign an expense item that is normally in user (example: Travel, Airfare, Mileage, etc.). It is mandatory to set up this setting. It is mandatory to set up this system setting, as unmatched credit card transactions will not enter Expense Track otherwise.

Additional System Settings

- **Enable Attachment/Receipt Requirement for Expenses (2161):** Allows you to require receipt images on all expense reports. You can require receipt images at the report header level, line item level, or both. Although there is a **Disabled** option, Expense Track requires all expense reports to have receipt images. Required receipt images help keep track of transactions for accounting purposes.

Note: If the transaction amount is a negative (a credit), this setting is ignored.

- **Accounting Code Selection Type (829):** Determines if users will manually enter or select accounting codes from a list. This setting allows you to determine how users will enter accounting codes on expense items.

Viewing Recent Credit Card Import Failures on Home Page

Tenant Administrators can quickly identify credit card import issues directly from the ExpenseTrack home page. A new informational section has been added that displays the most recent credit card import run date. If an import has not run within the last 24 hours, a warning message is displayed. In addition, administrators can view error counts from the last 10 import batches. Each error notification includes a link to a detailed page showing the affected transactions. Once the credit card import issue

ExpenseTrack

Administrator Guide

is resolved, the warning notification is automatically removed, helping administrators stay informed without manual monitoring.

The screenshot shows the Corpay Tenant List interface. At the top, there is a navigation bar with the Corpay logo, a home icon, a gear icon, and the text 'Integration ▾'. On the right side of the top bar, there is a user profile with the name 'John Smith 58' and a notification badge with the number '2'. Below the top bar, the main title is 'Tenant List'. There are filter options: 'Filter' (set to 'Active Tenants'), 'Keywords', and 'Submit'. To the right of the filters is a 'Sort' dropdown set to 'Tenant Name ▾'. The main content area displays a list of tenants, with the first item being '21st Century Oncology (apid_3035) (0035)'. To the right of the tenant list is a vertical toolbar with buttons for 'Add', 'Edit', 'Discontinue', 'Enable Tenant', and 'Generate registration token'. On the far right, there is a red-bordered box containing a warning message: '⚠ Ac41 File Import' with the subtext 'The last AC41 import ran on 2025-09-02 17:31:35 using the file ETL beta 11.', and '❗ Error in Ac41 file processing' with the subtext 'Batch 12436-21 error records detected. Click to view records marked as error.'

Creating Templates

A new menu item titled Accounts Coding Split Template is available under the Accounting section. This opens the Manage Accounts Coding Split Templates screen.

Administrators with the Manage Accounts Coding Split Templates (4225) permission can:

- Add, update, and delete templates.
- Mark any template as default for the tenant.
- Delete multiple templates in bulk.
- Use filters to efficiently manage and organize templates.

Applying Templates

Users with the Can Split Account Codes (63) permission can apply templates when editing expense drafts. The template selection panel appears:

- Directly below the splits section on the Add/Edit Expense Item screen.
- In the Manage Transactions Grid.

ExpenseTrack

Administrator Guide

The default template is auto-selected, and users can choose from other available templates via a dropdown menu. This allows for quick and consistent coding across transactions.

Set up Account Codes

Account codes are general ledger (GL) numeric values used to assign transactions to specific entities within your company. This allows your cardholders to associate expenses to different divisions and projects, which ultimately helps correctly allocate costs. This feature is especially useful if your users will split account codes or export accounting files into an Accounts Payable system.

Typically, your Corpay Implementation Specialist will set up account codes for you during your Expense Track setup. However, you can add or edit account codes at any time after setup. For best practice, consult a Corpay representative before configuring account codes to avoid causing problems.

Click a link below to learn more:

- [Set up Accounting Codes](#)
- [Set up Accounting Code Groups](#)
- [Set up Accounting Periods](#)
- [Manage External Account Codes](#)

Set up Accounting Codes

Although a Corpay Implementation Specialist will set up your account code structure, you can add or edit account codes at any time. Follow these steps to add/edit an account code.

1. On the Expense Track main menu, select the **Settings icon** () > **Accounting** > **Account Codes**.

ExpenseTrack

Administrator Guide

2. The Account Codes List page displays with a list of all account codes within your Expense Track instance. Click the **+** symbol to enter a new account code (or select an account code from the list and then click the **pencil icon** to edit).

Set up Accounting Code Groups

Accounting code groups allow you to associate a range of account codes to a group.

This feature is useful for easily managing account codes in a group rather than individually.

Note that the account codes should be created first before you assign them to a group.

1. On the Expense Track main menu, select the **Settings icon** > **Accounting** > **Accounting Code Groups**.

ExpenseTrack

Administrator Guide

2. The Accounting Code Groups List page opens with a list of all your accounting code groups. Select one of the options on the right side of the page.

Add/Edit an Accounting Code Group

1. Click **Add** to create a new accounting code group (or select one from the list and then click **Edit**).
2. Enter a name for the accounting code group. Then, click **Add Accounting Code Group**.

3. The accounting code group will display in the list.

ExpenseTrack

Administrator Guide

Download an Accounting Code Group

This option allows you to download an Excel spreadsheet of all account codes within the group. Use this feature to keep a physical record of all account codes within your accounting code groups.

Assign/Unassign Account Codes

Once you've created an accounting code group, you can begin assigning it account codes.

1. Select an existing accounting code group from the list, and then click **Assign**.
2. The Assign Codes Step 1 page opens. The page initially opens blank and provides fields for assigning and unassigning account codes. To populate the page with account codes, select an **Account Type** and then click **Retrieve**.

Note: The **Show All Unassigned** check box prompts the system to display only unassigned account codes when **Retrieve** is clicked. When **Show All Unassigned** is selected, the system ignores the **Account Type** selection and any value entered in the **Search Account Code** field. All unassigned account codes in the system will display.

Step 1 - Assign Codes to Test Code Group 1

| Account Type | Global | Search Account Code | Retrieve |
|---|--------------|---------------------|----------|
| <input type="checkbox"/> Show All Unassigned | | | |
| Unassigned Account Codes | | | |
| Account Type | Account Code | Description | |

Administrator Guide

Set up Accounting Periods

If your company's accounting periods change, you can apply those changes within Expense Track to avoid issues of processing expense reports. Normally, accounting periods are already set up for you, but you can edit these at any time.

1. On the Expense Track main menu, select the **Settings icon** () > **Accounting > Accounting Periods.**

2. The Accounting Periods page opens with a grid of all accounting periods set up for your company. Click the plus button () to add a new accounting period.

ExpenseTrack

Administrator Guide

3. Enter the **Start Date** and **End Date** of the accounting period. Optionally, you can enter a name for the accounting period if necessary. Click **Submit** when finished.

Add Accounting Period

| | | |
|--|---|----------------------------------|
| Start Date* | <input type="text" value="mm/dd/yyyy"/> | <input type="button" value="▼"/> |
| End Date* | <input type="text" value="mm/dd/yyyy"/> | <input type="button" value="▼"/> |
| Accounting Period Name | <input type="text"/> | |
| <input type="button" value="Clear All"/> <input type="button" value="Submit"/> | | |

Note: Be aware of the following as you create accounting periods:

- The **End Date** must be equal to or greater than the **Start Date**.
- When creating a new accounting period, the **Start Date** will default to the first available date that falls after the latest End Date in the grid. For example, if the latest
- End Date is Friday, January 27, the next available Start Date is Monday, January 30.
- Accounting Periods cannot overlap.
- Start Dates begin at 12:00:00 am of the date selected. End Dates end at 11:59:59 pm of the date selected.
- If editing, the Start Date and/or End Date will be read-only fields if those dates have passed.
- You cannot delete accounting periods. If you add an accounting period in error, contact a Corpay representative to have it removed.

ExpenseTrack

Administrator Guide

4. Your accounting period now displays in the grid on the Accounting Periods page.

Note: To edit an existing accounting period, select the check box for the period you want, and then click the edit icon.

Manage External Account Codes

If your account code information is stored in an external data source (i.e., an accounting system or ERP), you will need to use Corpay's Export Sync Tool to export and configure your account codes in Expense Track. When your account codes are exported and stored in the Expense Track database tables, you can add, edit, and delete each accounts coding.

Note: System setting 975 - Accounts Coding External Data source must be enabled to access the Manage External Accounts Coding page.

1. On the homepage select the system settings icon () >accounting > external account codes.

ExpenseTrack

Administrator Guide

2. The Manage External Account Codes page opens. Use the **Select Table** drop-down to select a table you wish to edit, then click **Refresh** to display the account codes in your selected table.

Note: The first table in the database will display by default.

The screenshot shows a table titled 'External Account Codes' with the following data:

| Account Code | Description | Reference ID | Account Code Group | Account Type | Enabled |
|--------------|----------------------------------|--------------|--------------------|--------------|---------|
| 1 | Viewpoint Construction & Service | | | Company | Yes |
| 10 | VCS Applicant Tracking | | | Company | Yes |

Set up Self-Service Card Management

If your users are assigned a Corpay Corporate Mastercard, they will have the ability to view their card's balance, credit limit, and transaction activity, or submit a request for a credit limit increase or replacement card. All of this can be done right within Expense Track. This feature eliminates many of the manual efforts involved with corporate card service requests, such as filling out paper forms and tracking each request. By adding this ability to the Expense Track website, you can manage card service requests from one location.

Note: The user must have at least one Corpay Corporate Mastercard assigned to them. Also, the following permissions/system settings are needed in order for users to access this feature:

- **(172) Manage Data Attributes.** Needed for Administrators to set up card request rules and parameters within Expense Track.
- **(2020) Manage Card Service Requests.** Assign this permission to users that will be responsible for reviewing and approving credit limit increase and card replacement requests. By selecting this option, you can configure approvals by location or location groups.
- **System Setting (1195) Enable Summary Approval/Decline from Approval List.** Ensure this system setting is set to **Yes** as it is also required for approvers to review and approve card service requests.
- **System setting (2031) Electronic Signature for Credit Card Limit Increase Requests (Optional).** This is an optional system setting that you can apply if you require an electronic signature for card service requests. You can require users to enter their password, employee ID, or email upon submitting a request.

Set up Card-Service Request Data Attributes

In order for users to submit credit limit increase and card replacement request, you must set up data attributes. Users will receive an error when attempting to submit a request until you set up the appropriate forms.

1. To access the setup process, select the **Settings icon () > Other Data > Manage Data Attributes.**

ExpenseTrack

Administrator Guide

2. This opens the Data Attributes Type List page; click **Add**.

The screenshot shows the 'Data Attribute Types List' page. At the top, there is a search bar with 'Filter' dropdowns for 'All' and 'All Statuses', a 'Keywords' input field, and a 'Submit' button. Below the search bar is a large empty table area with a vertical scrollbar. At the bottom of the table area, a message reads 'Showing All and All Statuses records. 0 item(s)'. To the right of the table is a sidebar with the following buttons: 'Add', 'Edit', 'Publish', 'Disable', 'Delete', 'Manage Data Attributes' (which is highlighted in blue), and 'Reset'.

3. Enter a name for the data attribute and ensure the name reflects the request you intend to create. For example, if you're creating a card replacement request, enter "card replacement" or something similar.

The screenshot shows the 'Add Data Attribute Type' page. It has two main input fields: 'Data Attribute Type Name*' and 'Data Attribute Category*'. The 'Name' field is empty, and the 'Category' field contains the value 'Card transaction dispute form'. At the bottom of the form are two buttons: a red 'Next' button and a grey 'Clear Entries' button.

Set up Card Service Request Approval Rules

After you complete setting up the data attribute, you can apply approval rules if your company requires card service requests to follow an approval process.

1. To access the Rules Wizard, select the **Settings icon (⚙)** > **Users** > **Rules**.

2. Click the **+** icon to create a rule.
3. In Step 1, set up the basic details on the rule, such as the rule name, start and expiration date, and priority. Ensure the **Rule Type** field is set to **Card Service Request** and **Applies to Expense** is set to **Yes**. Click **Next** when finished.

| Rule Wizard | Step 1 |
|---|---|
|  | <p>Rule Name * <input type="text"/></p> <p>Rule Type * <input type="text" value="Item Selection"/></p> <p>Start Date <input type="text"/> </p> <p>Expiration Date <input type="text"/> </p> <p>Priority * <input type="text" value="0"/></p> <p>Applies to Expense <input checked="" type="radio"/> Yes <input type="radio"/> No</p> <p>User Selectable <input type="radio"/> Yes <input checked="" type="radio"/> No</p> <p>Rule Enabled <input checked="" type="radio"/> Yes <input type="radio"/> No</p> <p><input type="button" value="Clear Entries"/> <input type="button" value="Cancel"/> <input type="button" value="Next"/></p> |

ExpenseTrack

Administrator Guide

4. In Step 2, set up additional details on the card service request rule, such as the Rule Class (**Replacement Card Request, Card Limit Increase Request**), optional exception information, and the Rule Restrictor (**None, Location Group/Location, User Group/User**). Click **Next** when finished.

| Rule Wizard | Test Rule 1 - Step 2 |
|---|--|
|  | <p>Please select the information class and exception policy for Approval rule:</p> <p>Company * TEST1 - Comdata Test 1 Company</p> <p>Rule Class * Item Category</p> <p>Remind Approver <input type="radio"/> Yes <input checked="" type="radio"/> No</p> <p>Reminder after Days 0</p> <p>Exception after Days 0</p> <p>Exception Action Do Nothing</p> <p>Exception To <input type="text"/> <input type="button" value=""/></p> <p>Rule Restrictor * None</p> <p><input type="button" value="Clear Entries"/> <input type="button" value="Cancel"/> <input type="button" value="Next"/></p> |

5. If you selected **Location Group/Location** or **User Group/User**, Step 3 allows you to select your users or locations the rule will apply to. If you selected **None** in the **Rule Restrictor** field, meaning the rule will apply to all users, Step 3 will ask you to select an approval routing type. Make your selection and click **Next**.

| Rule Wizard | Test Rule 1 - Step 3 |
|---|---|
|  | <p>Please enter Item Category specific approval information:</p> <p>Item Category * Advertising & Marketing</p> <p>Routing Type * <input checked="" type="radio"/> Stop <input type="radio"/> Chain <input type="radio"/> Parallel <input type="radio"/> Manager <input type="radio"/> Org Tree</p> <p><input type="button" value="Clear Entries"/> <input type="button" value="Cancel"/> <input type="button" value="Next"/></p> |

ExpenseTrack

Administrator Guide

| Routing Type | Description |
|-----------------|---|
| Stop | The request will not be sent to any other users for approval. However, this option prevents users from submitting a card service request. |
| Chain | Allows you to select a series of users to review and approve requests. |
| Parallel | Allows you to select multiple approvers; if one user in the group approves the request, the other users will not need to approve it. |
| Manager | Each request will need to be approved by the user's manager. |
| Org Tree | Allows you to specify the levels in your organization the request must follow. |

6. If you selected **Chain** or **Parallel**, Step 4 asks you to select the users to include in the approval chain. Once you add a user, use the **Move Up** and **Move Down** buttons to determine the order users will need to approve the request, with the top user being first in the chain. Make your selections, then click **Finish**.

Approve and Process Card Service Requests

Once a user submits a card service requests, and you have applied the appropriate approval rules, you or any user you deem responsible can review and approve requests, and submit them for processing.

Note: Remember, in order to approve and process card-service requests, the following permissions and system settings are required:

- **(2020) Manage Card Service Requests.** Assign this permission to users that will be responsible for reviewing and approving credit limit increase and card replacement requests. By selecting this option, you can configure approvals by location or location groups.
- **System Setting (1195) Enable Summary Approval/Decline from Approval List.** Ensure this setting is set to **Yes** as it is also required for approvers to review and approve card service requests.
- **System Setting (2031) Electronic Signature for Credit Card Limit Increase Requests**
(Optional). This is an optional system setting that you can apply if you require an electronic signature for card service requests. You can require users to enter their password, employee ID, or email upon submitting a request.

ExpenseTrack

Administrator Guide

Approve Card Service Requests

1. To access card-service requests that are in approval, select **Travel & Expense > Card Service Request Approvals**.

2. The Card Service Requests to Approve page contains each requests requiring your review. Select the check box for a request and then click either **Approve** or **Decline**. If there are multiple approvers in the approval route, you can click **Return** to send a request back to the previous approver.

| Manage Card Service Requests | | | | | | | |
|--|-------------------|--------------|--------------|------|-------------|------|------------|
| T | | X | | | | | |
| <input type="checkbox"/> ID | Card Account Name | Date Created | Days Pending | User | Employee ID | Type | Status |
| 25 <input type="button" value="per page"/> | | | | | | | 1 - 0 of 0 |

Note: Click the **Reference No.** to review details on a request.

ExpenseTrack

Administrator Guide

3. Click **OK** on the confirmation popup.

Note: If you decline a request, you will need to enter a reason for your decline.

- The request is approved and removed from the list. The requestor will receive a message notifying them of your approval. If there is an approval chain, the next user in the chain will receive a notification message telling them they need to approve the request.

Process Card Service Requests

After a request is approved and ready to be processed, an email is sent to all users with permission **2020 – Manage Card Service Requests** for the requestor's expense location. The processing user can reject or submit a request for processing.

Note: Direct integration with the card management system will be available at a later date. At this time, credit limit increases and replacement cards must be processed in iConnectData and then marked as processed in Expense Track to track the status of the request.

1. To process card service requests, select **Travel & Expense > Manage Card Service Requests**.

ExpenseTrack

Administrator Guide

2. Select a request and then click the check mark button () to mark it as processed or click the x button () to reject it. To review the details on a request, click the **Reference No.**

| Manage Card Service Requests | | | | | | | | |
|---|----------|---|--------------|--------------|------|-------------|------|------------|
|   | |   | | | | | | |
| <input type="checkbox"/> | ID | Card Account Name | Date Created | Days Pending | User | Employee ID | Type | Status |
| 25 | per page | | | | | | | 1 - 0 of 0 |

3. You will receive a success message upon confirming your selection. The Status column reflects the action the approver user took on the request (Approved, Declined, New/In Approval) or the action you performed (Processed, Rejected). These requests are never removed from this page, so you can always come back and search for past requests if needed.

Note: You can only process or reject requests in Approved status.

ExpenseTrack

Administrator Guide

Manage Expense Track

Once all of the set up pieces are complete, you can begin using and managing Expense Track. A common task for Administrators is to ensure data is accurate and current within the system. You can also change system settings, add and delete user accounts, and approve or decline expense reports. You can perform many of the same operations as your users (see the Expense Track user guide for more information), but there are some Administrator-specific tasks such as reconciling expense reports and correcting credit card transaction data.

See below for a list of management tasks:

- [Correct Unmatched Corpay Mastercard Transactions](#)
- [Assign Delegate Users](#)
- [Approve Expense Reports](#)
- [Reconcile Expense Reports](#)
- [Extract Expense Data](#)

Correct Unmatched Corpay Mastercard Transactions

All transactions performed with a Corpay Mastercard are imported into Expense Track and collected into draft expense reports. These draft expense reports are auto-created based on your company's expense period (weekly, semi-monthly, monthly, etc.). The transactions for the expense period match to reports based on the user, customer ID, and expense item (transaction detail). The transactions themselves match to an expense item based on the Mastercard Merchant Category Code (MCC).

When Corpay Mastercard data is imported into Expense Track, the users associated to each line item will receive a notification in Expense Track Messages, informing them of the import. You can define how often Expense Track generates draft expense reports for imported Mastercard transactions. For example, if the frequency is set to monthly, your users will receive a draft expense report for all transaction for the previous month. Understanding the credit card expense draft frequency allows for efficient expense tracking and approval.

However, transactions may fail to match to the correct expense item if an error occurs

ExpenseTrack

Administrator Guide

in the mapping. These are known as unmatched transactions. In this situation, users cannot submit the expense report until they match the transaction to the correct expense item. There are multiple avenues for correcting unmatched transactions. Users will also receive notifications in Expense Track Messages of the failed matched items. The notification will be sent every day until the user corrects the expense item.

Note: Only posted Corpay Mastercard transactions display in Expense Track.

Transactions generally appear 24 hours after the posting date except for Sundays.

Click a link below to learn more:

- [Correct Corpay Mastercard Transactions on Expense Reports](#)
- [Correct Corpay Mastercard Transactions By Batch](#)
- [Correct Corpay Mastercard Transactions by User](#)

[Correct Corpay Mastercard Transactions on Expense Reports](#)

If a Corpay Mastercard transaction fails to match to an expense item, it will match to the default expense item you defined at [set up](#). If this happens for you or your users, you can make a correction on the expense report.

Note: You cannot correct transactions for another user on their expense report unless you are assigned as a Delegate user. However, you can do so through the [Expense Import Summary by Batch](#) page.

ExpenseTrack

Administrator Guide

1. Access the Expense Dashboard (**Expense Track home page > Travel & Expense > Expense Dashboard**).

The screenshot shows the 'Travel & Expense' navigation bar with a dropdown menu. The 'Expense Dashboard' option is highlighted with a red box. Below the navigation bar, there are three main sections: 'Manage/Search', 'Filters', and 'Approve/Reconcile', each with a list of sub-options. The 'Expense Dashboard' option is also highlighted with a red box in this section.

| Manage/Search | Filters | Approve/Reconcile |
|---------------------|---------------|-------------------------------|
| Expense Dashboard | Open Expenses | Pending Approval |
| Expense Drafts | Old Expenses | Pending Expense Line Approval |
| Manage Transactions | All Expenses | Approval History |
| Import Expenses | | |

2. Open an expense report you know has unmatched Corpay Mastercard transactions.

The screenshot shows the 'Expense Drafts' page. At the top, there is a toggle switch for 'Only show drafts created for me'. Below that is a search bar and a 'Create Expense Report' button. The main area displays a table of expense reports with the following columns: Report Title, Date, Created by, Created for, Total (USD), and Actions. The 'Actions' column contains icons for edit and delete. The table has 5 items, and the first item is highlighted with a red box.

| Report Title | Date | Created by | Created for | Total (USD) | Actions |
|--------------------|------------|----------------------------|----------------------------|-------------|---------|
| Test 2/6 | 02/06/2023 | Verian Admin - Hanna Alemu | Verian Admin - Hanna Alemu | \$ 0.00 | |
| Release 12.22_Test | 01/17/2023 | Verian Admin - Hanna Alemu | Verian Admin - Hanna Alemu | \$ 0.00 | |
| Release 12.22 | 04/08/2022 | Verian Admin - Hanna Alemu | Verian Admin - Hanna Alemu | \$ 0.00 | |
| Test 2 | 04/07/2022 | Verian Admin - Hanna Alemu | Verian Admin - Hanna Alemu | \$ 0.00 | |
| Test 1 | 04/07/2022 | Verian Admin - Hanna Alemu | Verian Admin - Hanna Alemu | \$ 0.00 | |

ExpenseTrack

Administrator Guide

3. Unmatched transactions display in the Expense Items table in red flag status and only the **Move** icon is available in the **Actions** column. The **Item** column displays the default expense item in a drop-down menu (in the example below, it is labeled **Please Select**). Use the drop-down menu to select the correct expense item. Then, click **Save**.

The screenshot shows a table titled "Expense Items" with a single row. The table has columns for Flag, Date, Item, Vendor, Type, Qty, Amount, Line Total, and Actions. The "Item" column dropdown is set to "Mileage". The "Actions" column contains icons for Delete, Move, Edit, and Print. The "Actions" column for the first row contains a red minus sign icon. The "Entered Expense Total (USD): \$ 0.00" field is present at the bottom.

| Flag | Date | Item | Vendor | Type | Qty | Amount | Line Total | Actions |
|--------------------------|------|---------|--------|---------|-----|--------|------------|---|
| <input type="checkbox"/> | | Mileage | | Mileage | 1 | 0.00 | \$ 0.00 |      |

4. The expense item may not change to green-flag status, but now you have all options to edit the expense report. Repeat this process for all unmatched expense items.

The screenshot is identical to the one above, but the "Move" button in the "Actions" column for the first row is highlighted in red.

| Flag | Date | Item | Vendor | Type | Qty | Amount | Line Total | Actions |
|--------------------------|------|---------|--------|---------|-----|--------|------------|---|
| <input type="checkbox"/> | | Mileage | | Mileage | 1 | 0.00 | \$ 0.00 |      |

ExpenseTrack

Administrator Guide

Correct Corpay Mastercard Transactions by Batch

As an Administrator, you can monitor all imported Corpay Mastercard transactions through the Expense Import Summary by Batch page. Use this page to view matched and unmatched credit card transactions by daily batches and make corrections as necessary.

1. On the main menu, select **Travel & Expense > Expense Import Summary by Batch**.

2. The Import Summary by Batch page opens with a table list of all batches. Each batch displayed on this page contains up to 24 hours of posted transactions. Click a batch ID to view transaction details.

ExpenseTrack

Administrator Guide

Note: Use the **Filter** button () to narrow the results in the table. Use the **More Actions** button to export selected rows or the entire table to an Excel spreadsheet.

3. The Card Transaction Detail page opens with info on each transaction in the batch. Transactions that enter unmatched will be in **Exception** status and the **Exception Type** column explains the reason for the exception. If the transaction is in **Processed** status, edits can be applied only from the **Edit Expense Report** page. Select a row(s) using the check boxes in the far left column and then select the **More Actions** drop-down to perform one of the following actions:
 - **Archive.** Archives the transaction so it cannot be edited or submitted. Note that this does not delete the transaction from Expense Track.
 - **Reprocess.** Sends the transaction for reprocessing to add to an expense report.
 - **Edit Transactions.** Assign the transaction(s) to an existing user or expense item.

ExpenseTrack

Administrator Guide

- **Create Users.** Create a new user and assign them to an expense item.
- **Export current view.** Export all selected rows to an Excel spreadsheet.
- **Export All Rows.** Export all rows to an Excel spreadsheet.

Correct Corpay Mastercard Transactions by User

The Expense Import Summary by User page allows you to review imported Corpay Mastercard data that has been associated to a user. If you grant a user permission to view this page, they will see only their transactions. As an Administrator, this page is similar to the Expense Import Summary by Batch page, but includes the total amount spent in each batch.

ExpenseTrack

Administrator Guide

1. On the Expense Track main menu, select **Travel & Expense > Expense Import Summary by User**.

2. The Import Summary by User page opens with a table list of all transactions grouped into batches. Similar to the Import Summary by Batch page, each batch contains up to 24 hours of your posted transactions. Click a link in the **Batch ID** column to view a batch's transaction details.

| Import Summary by User | | | | | | | |
|------------------------|---------------|-------------------|---------------------------|-----------------------------------|-------------------------------------|----------------------------|--------------------|
| List of Batches | | | | | | | |

Assign Delegate Users

The Delegate User feature of Expense Track allows your users to assign other users as delegates to manage their expense reports. As an Expense Track Administrator, you can assign one user as a Delegate for one or multiple other users. This feature is useful if a user is out of the office or never accesses the website to manage their expenses. Delegates managing expense reports on behalf of other users will receive email notifications when transactions they handled are declined. This ability ensures delegates are promptly informed of declined items, allowing faster follow-up and resolution.

Follow the steps below to set up a Delegate user.

ExpenseTrack

Administrator Guide

Note: Permission **4120 - Manage User Delegates** must be selected to use this feature.

1. On the Expense Track home page, select the **Setting icon** > **Users** > **User Delegates**.

2. Complete each field to set up the Delegate user. See field descriptions below. Note that each field is a typeahead field, meaning if you enter a few letters or numbers, matching results will display.

Note: If you enter values in the **Individual Users**, **User Groups**, and **Location Groups** fields, or a combination of two of the fields, the Delegate user will have access to each user within the selected segments.

For example, if you enter Group A and Group B in **User Groups**, and Location A and Location B in **Location Groups**, the Delegate user will be assigned to each user in each group.

Update **Cancel**

Approve Expense Reports

Once a user submits a draft expense report, it must go through approval at your company's management level. Review each report to ensure there are no issues. You can approve an entire expense report or each expense item in a report. You should have defined approval rules during the expense track set up process.

Select a task below for more details:

- [Approve Expenses](#)

ExpenseTrack

Administrator Guide

Approving Expense Reports

Use this section to understand how to approve expense reports. You can approve an entire report or each specific expense item in a report. Also, note that you can approve expense reports within the Expense Track website or from the notification email.

- [Approve Expense Reports in the Website](#)
- [Approve Expense Reports from Notification Email](#)

Approve Expense Reports in the Website

1. There are two ways to access expense reports for approval:

- Select **Travel & Expense > Pending Approval**.

ExpenseTrack

Administrator Guide

- Alternatively, under the Tasks section, select **Expense Reports to Approve**.

The screenshot shows a 'Tasks' section with two main categories: 'Approval' and 'Accounting'. The 'Approval' category has 1 item: 'Expenses to Approve'. The 'Accounting' category has 10 items: 'Expense Reports to be Reconciled'.

- On the Expenses Reports to Approve page, click an **Expense Report #** from the Documents Pending Approval list. If you have a large list of reports, use the **Filter** option at the top of the page to quickly locate a report.

The screenshot shows a table titled 'Documents Pending Approval' with one row of data. The columns are: Type (Expense Report), Expense Report # (1582565), Report Title (03/24/2019-03/30/2019), From (Hanna A.), Creation Date (11/19/2021 10:47 AM), Location (Comdata), Waiting for Approval (668 day(s)), Company (Corpay), and Amount (\$ 107.76). Below the table, there is a dropdown for '25 per page' and a page number '1 - 1 of 1'. At the bottom are three buttons: 'Approve', 'Return', and 'Decline'.

- The Expense Report Approval page opens. This page provides a detailed view of the expense report items. A brief overview of the report is given at the top of the page, followed by a list of all expense items, and ending with the Notes, FYI Notifications, and Edit Approval Routing sections. Review each detail on the expense report, including each expense item.

| Attendees : xyz . Client Lunch | | | | | | | | | |

- To approve an expense item, select the checkbox under the **Approve?** column. Declined items should remain unselected; if you have declined expense items, you can still process the report, but those declined items will not be processed for approval. Select the check box under **Approve?** to select all of the expense items in the list for approval.

ExpenseTrack

Administrator Guide

Note:

- If you decline an expense item, all details on the item will remain, such as any attached receipts, notes, and accounts coding information.
- The Alerts column identifies the status of the expense item: green flag – item is ready for approval, yellow flag – item is not in compliance but can still be approved.
- The Approved Amount and Quantity columns may be open for editing, but you cannot edit these columns for Corpay Corporate Mastercard transactions.

Use the Expense column to perform additional functions.

| Detailed Approval for Expense Report #1582565 | | |

ExpenseTrack

Administrator Guide

You can view and scroll through receipts images on the right side of the page and download and print them as needed. If the attachment is not an image or PDF, a download icon will display.

Once all information has been verified, you can reject or approve the item by selecting the **Reject** or **Approve** buttons located on the top right side of the page. You can also move to the previous or next expense item by clicking on the left and right (**<** **>**) arrows at the top of the page, as well as returning to the expense report by clicking **Return to report**.

5. Back on the Expense Report Approval page, scroll down to the **Note to Requestor** and **Approval Notes** fields below the Detailed Approval for Expense Report section.

Use the **Note to Requestor** field to enter information for the user that submitted the report. Your notes will be sent to the user through the Messages feature and/or email after saving. For example, if you change the reimbursement amount, you can alert the user through the requestor notes. Use the **Approval Notes** field to enter a note for multiple approvers involved in the approval process. When a note is added, other approvers in the route can view the notes entered in the field.

Note: Clicking **Clear Entries** only resets the values entered in the **Approved Amount**, **Quantity**, **Approval Notes**, and **Note to Requestor** fields.

6. The bottom of the Expense Report Approval page holds the Discussion Notes, FYI Notifications, and Approval Routing sections. See the following pages to understand how to use each section.

The screenshot shows the 'Discussion Notes' section with a table containing one note from 'Kristen Wiig' to 'Testing Dummy'. It also shows the 'Send FYI Notifications' section with a message 'No FYI notifications found' and the 'Edit Approval Routing' section with a rule for 'Route to Manager' involving 'Kristen Wiig (Active)'. Buttons for 'Add Note', 'Add New User', and 'Add' are visible.

Notes: Use the **Discussion Notes** section to enter notes on the expense report for other users to view. For example, if multiple people need to approve the expense report, you can send a note to other approvers in the route to inform them on something related to the report. Each user will immediately see the note and be able to reply to it by clicking the **Reply** button (➡).

Click **Add Note** to start.

The 'Add Note' dialog box contains fields for 'To User' (set to 'Expense Track Admin Test User'), 'Subject' (set to 'Expenses'), and 'Note*' (containing the text 'For your approval'). A microphone icon is present in the note field. Buttons for 'Reset' and 'Submit' are at the bottom.

ExpenseTrack

Administrator Guide

Enter the user's name, subject line, and note. Click **Submit** when finished, which will generate an internal message that will notify all included users of your note. Add as many notes as necessary.

Note: You can leave the **To User** field blank and still add the note for yourself, if necessary.

FYI: Use the **FYI Notifications** to send notifications to specific users. These notifications are beneficial when other users need to be informed about an expense report, but do not need to approve it. To add a user for FYI notifications:

- a) Click inside the **Add New User** field.
- b) Enter a name in the field and select the username that appears in the search result, then click **Add**.

Send FYI Notifications

Add New User

+ Add

ExpenseTrack

Administrator Guide

- d) To delete a user, click the  under Remove? A dialogue box will display to confirm you want to delete the user. Click OK to confirm.

Approval Routing: Use the **Approval Routing** section to view each user in the approval route. A user with the word "active" next to their name is the current approver. The user with the word "open" next to their name needs to approve the report. A user with the word "closed" next to their name has approved the report.

When adding users to the approver route, note the following:

- A new approver can only be inserted after the current active approver.
- The current approver or any previous approver cannot be moved up or down.
- Only the user who added the approver can delete the added approver.
- When there are multiple rules in effect, the selection of the approver under the rule determines where the approver should go in the rule chain.

The screenshot shows a modal window titled "Edit Approval Routing". It displays a list of users for a specific rule: "Rule 5792-5792: Route to Manager". The list contains one item: "1 Kristen Wilig (Active)". Below the list is a search bar labeled "Add New User" and a red "Add" button.

To add a user to the approval route:

- a) Click inside the **Add New User** field.
- b) Enter a name in the field and select the username that appears in the search result, then click **Add**.

ExpenseTrack

Administrator Guide

c) The user will be added to the routing. To change the order of the routing, use the up and down arrows (). The user at the top of the list is first in line to approve.

Approve Expense Reports from the Notification Email

If you are responsible for approving one or more users' expense reports, you will receive an email notification whenever they submit a draft report. The email includes all details on the report, including the report title, total amount, each individual expense item (line item), and any coding applied. You can approve the expense report right from the email, which is convenient if you can't access the website.

Once you approve the email, you will receive a response email displaying your approval activity.

You can approve expense reports from the notification email, by doing one of the following:

- You can approve and decline individual line items by entering "x" or "y" (approve) or "n" decline in the brackets within the line item details. For example: (1)[x]... 1/EA1 Meals & Entertainment @ \$24.67 (ID9642) 1001-7500-1401-70310 (100%) Fraudulent Charge? No
- You can also approve or decline individual line items by adding your decision to the end of the line ID. For example: (ID9642=YES) (ID9643=NO).
- If your instance of Expense Track is set up for default approval (such as all line items are approved by default), reply to the email with no comments. The system will approve or decline the report based on your defaults.
- To Approve the entire Expense Report, reply to the email with "YES" or "Y" in the first line of your reply. To decline the entire Expense Report, reply to the email with "NO" or "N" in the first line of your reply.
- Avoid using special characters in any of your replies. Incorrect values will cause an error and send the email back to the report submitter.

Administrator Guide

Approval Notification Email

Dear ESTON ROPE :

Your approval is needed. For limited capacity e-mail clients like Blackberry please see instructions at end of this email.

Otherwise, you can approve online by following this link (<https://prod.comdata.verian.com/ProdCD/>) or by replying to this e-mail with appropriate marks in the approval brackets. You can either approve the whole order or approve by line item.

To approve mark x or y within the square brackets [] .

To decline mark n or leave blank.

Expense Report (reference 840) with 2 items totaling \$ 208.20 by Kim South for Mar 2017.

Number of Attachments: 2

(840)=====

(0)[Y]...Approve Entire Expense Report (ID0)

Line Items:

(1)[...] 1/EA1 Meals & Entertainment @ \$ 24.67 (ID9642)

1001-7500-1401-70310 (100%)

Fraudulent Charge?: No

(2)[...] 1/EACH Meals & Entertainment @ \$ 183.53 (ID9643)

Fraudulent Charge?: No

Reason:[]

(840)=====

Blackberry and Limited Mobile Email Client Instructions:

If you cannot edit the original message you can add approval instructions in your reply text this way:

If the approval as defaulted is what you want (normally decline everything), simply sent reply without any comments. The system will approve or decline as defaulted.

To specifically decline the whole Expense Report simply write NO or N in the first line of your reply text.

To specifically approve the whole Expense Report simply write YES or Y in the first line of your reply text.

You can make detail approvals if needed by providing line IDs as specified at the end of each detail line followed by your decision.

For example, if you need to approve an item which ends with ID1830 you can put one line in your reply in this

fashion:

ID1830=YES

Similarly if you wanted to decline that specific line you can use:

ID1830=NO

Any line beginning with a colon (:) will be sent back to Kim South as comments. E.g.:

:please look at alternative items

Do not modify below this line:

[[P:L4KTCm\$\$G~kKC)F,4]M2f]2ff]2MaM]@]@]1:s]@|ff]@2fl]]

No further action on your part is required otherwise.

Reconcile Expense Reports

Reconciling and releasing an expense report is the final step before the expense can be reimbursed to an employee or returned to your company's accounting system. This step occurs after all required receipts have been checked off and settled in the web portal. Once an expense is reconciled, it is marked as Fully Released, meaning everything on the report was accurate and can be added to accounting. This process is usually completed by someone in your accounting department.

The following steps are involved with reconciling expenses:

- [Reconcile Expense Reports](#)
- [Manage Reconciled Expense Reports](#)

ExpenseTrack

Administrator Guide

Reconcile Expense Reports Waiting for Receipts

The reconcile process involves comparing the expense receipts with the expense report and releasing the expense for payment. Your company's accounts payable department typically completes this function. Depending on your Administrator's decision, you may be restricted to reconcile your own expenses or expenses by other users.

Reconcile Expense Reports

1. From the Expense Track main menu, select **Travel & Expense > Pending Reconciliation**.

2. On the Pending Reconciliation page, select an expense from the Expense Report List and then click **Reconcile Expense**. Use the **Filter** drop-down at the top of the page to quickly locate an expense if you have a large list.

The screenshot shows the 'Pending Reconciliation' page. A context menu is open over a row for 'Admin (22)'. The menu options are:

- Reconcile expense
- View expense
- Print preview
- Mark as released
- Decline expense
- Export current view
- Export all rows

| Transactions | | | | | |

ExpenseTrack

Administrator Guide

Note: Use the other features of the Pending Reconciliation page as necessary:

- **View Expense:** Opens the Expense Report Detail page where you can make edits to the expense items.
- **Print Preview:** Opens a printable version of the expense report.
- **Mark as Released:** Reconciles the entire expense report without needing to reconcile each expense item. This step manually releases the expense report for payment, allowing you to skip the reconciliation process.
- **Decline Expense:** Declines the entire expense report for reconciliation.
- **Export Current View:** Allows you export the current page into an excel file.
- **Export all Rows:** Allows you export all pages into an excel file.

3. On the Reconcile Expense page, verify each approved expense item is appropriate and accurate. Select the check box in either the **reconcile** or **decline** column for each expense item. Then, click **process** to reconcile the expense item(s) or **decline** marked to decline the expense item(s).

Manage Reconciled Expense Reports

Expense reports that have been released for payment display in the system for your viewing.

You cannot make changes to a released expense report, but you can review its details and print it for your records. Also, note that you must have the appropriate permissions to access this feature. For access, contact your Administrator.

Note: If the expense report comes from a Corpay Corporate credit card transaction, the total amount is not reimbursable.

Review Managed Expense Reports

1. On the Expense Track main menu, select Travel & Expense > Reconciled Expenses.

ExpenseTrack

Administrator Guide

2. On the Reconciled Expenses page, select an expense report from the Released Expense Report List, and then click **View Expense**.

View Approval Routing

Rule 5792-5792: Route to Manager

1 Admin (22) (closed)
Start: 02/07/2024, Completed: 02/07/2024

ExpenseTrack

Administrator Guide

4. To print an expense report, select one from the Released Expense Report List and then click **Print Preview**. This opens a printable version of the expense report opens. Use your web browser's printing option to print the report.

Generate Reports

Expense Track contains a suite of standard, preformatted reports on your account activity and information. Use these reports for record keeping and to analyze specific aspects of your program, such as cardholder spending, submitted and approved expense reports, and details on your Expense Track users.

Click a link below to learn more.

- [Accessing and Running Reports](#)
- [Report Samples](#)

Accessing and Running Reports

Before you begin, it's important to understand how to access and run reports. There are many parameters and prompts that allow you to filter and customize the data in each report.

1. On the Expense Track home page, click **Spend Manager > Ad Hoc Reporting**.

ExpenseTrack

Administrator Guide

2. On the Ad Hoc Reporting screen, select **View > Repository**.

The screenshot shows the Corpay Ad Hoc Reporting interface. At the top, there is a navigation bar with 'Library', 'View', and 'Create' buttons. A dropdown menu is open under 'View', showing 'Search Results', 'Repository' (which is highlighted in red), 'Schedules', and 'Messages'. The main content area is divided into several sections: 'Recent Items' (with a link to 'Expense Transaction Detail Updates'), 'Video Tutorials' (listing 'Ad Hoc Views', 'Reporting and Scheduling', 'Dashboards', 'Data to Analysis', 'Domains', and 'Jaspersoft 8 Video Playlist'), 'Popular Resources' (listing 'Quick Start Guide', 'Documentation', and 'TIBCO® Jaspersoft Community'), and 'Visualizations' (listing 'Ad Hoc Views', 'Reports', and 'Dashboards' with 'Create' and 'View list' buttons). Below these is a 'Data' section with 'Data Sources' and 'Domains' with similar buttons. The overall interface is clean and modern, using a dark header and light-colored cards for different sections.

3. In the Folders column, select **Public > Standard Reports > Expenses**.

The screenshot shows the 'Repository' screen with a 'Folders' tree on the left. The tree is organized into several main categories: Comdata, Public, Standard Reports, Assets, Budgets, Comdata, Expenses, Invoicing, Purchasing, Travel and Expense, Work Orders, Templates, Testing, and Verian. The 'Public' folder is selected, and the 'Standard Reports' folder is expanded, showing the 'Expenses' folder. The 'Expenses' folder is highlighted with a red box and a cursor is hovering over it. The main pane shows a table with columns for 'Name', 'Description', 'Type', 'Created D...', and 'Modified D...'. A message at the bottom of the main pane says 'There are no resources in the folder.'

ExpenseTrack

Administrator Guide

4. To run a report, click a report name in the Repository list.

5. In the Input Controls window, select the variables to run the report and then click **Apply** to generate the report. Then, click **OK** to close the window.

ExpenseTrack

Administrator Guide

Note: The options in the Input Controls window will vary by report type.

The screenshot shows the 'Input Controls' window. It has two date fields: 'Start Date' (2017-04-17) and 'End Date' (2017-05-16). Below these is a 'Manager' section with a search interface. The search bar shows 'Available: 528' and 'Selected: 0'. A search field contains 'Search list...' and a magnifying glass icon. A scrollable list of names follows, including AARON DAILEY, ABBEY DEL ROSARIO, ADAM HAFKEY, Admin (7), AISHA STEINBER, ALAN HARRIS, ALAN STEINBERG, ALFREDA TURNER, and ALICE ABLES. At the bottom are buttons for 'Apply', 'OK', 'Reset', 'Cancel', and 'Save'.

6. The report will generate and display on screen. You have several options from here.

See next page for field descriptions.

Note: If there is no information to display based on your entered criteria, the message "The report is empty" will display.

The screenshot shows the 'Expense User Information' report. The title bar includes 'Expense User Information', 'Data refreshed May 16, 2017 at 3:16:05 PM', and a refresh icon. The toolbar has buttons for Back, Forward, Home, Print, and a search bar. The main table has a header row with columns: First Name, Last Name, Employee ID, User ID, User Email Address, and Card Number. Below is a list of users:

| First Name | Last Name | Employee ID | User ID | User Email Address | Card Number |

ExpenseTrack

Administrator Guide

| Option | Description |
|---|--|
| Save  | Allows you to save the report in another folder within the AdHoc Reporting application. For example, if you have another folder titled Corpay Reports, you can save your generated report into there. Selecting this option provides the opportunity to rename the report title and/or the report's description. |
| Export  | Allows you to export and save the report in another format. Options include: PDF, Excel (paginated), Excel, CSV, docx, RTF, ODT, ODS, XLSX, XSL (paginated and non-paginated), and PPTX. |
| Undo/Redo/Undo All  | If you make a change to the report (filter the column view, perform a search, etc.) you can undo or redo a change or undo all of your changes. |
| Edit (Options)  | Opens the Input Controls window and allows you to change the data and rerun the report. |
| Zoom  | Allows you to zoom in and out of the report on screen. |
| Search  | Allows you to search the report for a specified keyword. |
| Refresh  | Allows you to refresh the data in the report. |

7. If you are done viewing the report, click the **Back** button () in the top left-corner or return to the Repository view and make another report selection or exit the application.

Expense Accounting Code Detail

- **Description:** A list of cardholder transaction details by account code and customer ID. Use this report to analyze transaction details under each of your account codes and customer IDs.
- **Input Controls:** Posting Start Date, Posting End Date, Transaction Start Date, Transaction End Date, Cardholder, Expense Item, Coding Value Filters (Type1Seg - Type3Seg5)
- **Fields:** Account Code, Customer ID, Employee ID, Card Number, Last Name, First Name, Location Group, Location, Transaction Date, Posting Date, Expense Description, Vehicle Number, Reporting Level, Merchant Code, Merchant Name, Merchant Address, Merchant City, Merchant State, Merchant Zip, Merchant Group, Gallon, Status, Approval User, Approval Date, Export Status, Export Date, Card Transaction, Amount Coded, Transaction Amount, Credit Debit, Miscellaneous 1, Miscellaneous 2, Coding Type, company, Division, Department, GL Account
- **Additional Notes:** The Excel export does not automatically format columns with exported currency or number fields. Users will need to manually format these columns for the values to display correctly.

Expense Accrual Report - Aging Information

- **Description:** Totals by user of transactions not ready for export as of the date run for the dates and users specified in the input controls. Totals are shown in aging columns of 0-30, 31-60, 61-90, 90-120, and 120+.
- **Input Controls:** From Date, To Date, Users
- **Fields:** Card Number, User, Email Address, Aged (0-30), Aged (31-60), Aged (61-90), Aged (91-120), Total Outstanding, Manager/Approver, Manager/Approver Email
- **Additional Notes:** This report contains one line per user with totals separated by the aged columns. Also includes all transactions that have not been exported.

Expense Accrual Report - Cardholder Detail

- **Description:** A detailed list of each transaction by cardholder that is not ready for export (pending submission, pending approval, pending reconciliation, etc.) as of the date run for the dates and users specified in the input controls.
- **Input Controls:** From Date, To Date, Users
- **Fields:** Cardholder, Email Address, Account Number, Transaction, Merchant Name, Transaction Date, Post Date, MCC, MCC Description, Expense Description, Manager/Approver, Manager/Approver Email
- **Additional Notes:** This report contains one line for every transaction with coding. If the transaction contains split coding, it will display twice on the report with the split amount. Coding on this report is dependent on your accounts coding configuration. Also includes all transactions that have not been exported.

Expense Accrual Report - Cardholder Summary

- **Description:** Totals by user and coding value combination for the transactions that are not yet ready for export (pending submission, pending approval, pending reconciliation, etc.) as of the date run for the dates and users specified in the input controls.
- **Input Controls:** From Date, To Date, User
- **Fields:** User Email Address, Card Number, Transaction Amount, Manager/Approver, Manager/Approver Email, Coding segments setup with values coded (if coded)
- **Additional Notes:** This report contains lines per cardholder and coding. Transactions are summarized by each user and the codings applied. Also includes all transactions that have not been exported.

ExpenseTrack

Administrator Guide

Expense Approver Detail

- **Description:** A detailed report of cardholders with approved and unapproved expense reports. Use this report to track the status, current assignment, days open, and total amount submitted for all cardholder expense reports.
- **Input Controls:** Start Date, End Date, Approver, Transaction Type
- **Fields:** Cardholder, Card Number, Posting Date, Transaction Date, Merchant, Expense Amount, Expense Description, Coded, Approver, Approved

Expense Approver Summary

- **Description:** Summary of transaction expenses assigned to approvers. The report identifies whether the approver has approved the expense or not.
- **Input Controls:** Start Date, End Date, Approver
- **Fields:** Manager, User Name, User ID, Email Address, Transaction Amount, Transaction Count, Coded, Pending Coded, Approved, Pending Approval

Expense Audit

- **Description:** Detailed audit information regarding modifications to the system made by users. Use this report to keep track of system changes by each user for audit purposes.
- **Input Controls:** Start Date, End Date, Modified by User, Modification Type
- **Fields:** User Name, User ID, Modification Type, Item Modified, Field Modified, Detail, Date Modified, Time Modified
- **Additional Notes:** Changes made to a submitted expense report will display as **PO** instead of the expense report title.

ExpenseTrack

Administrator Guide

Expense Cost Allocation Summary

- **Description:** A summary of transactions totals by coding string for the filter criteria specified in the input controls. This report runs only at the company level. Use this report to track allocation of expenses to accounting codes.
- **Input Controls:** Start Date, End Date, Coding Type
- **Fields:** Coding Type, Accounting String, Transaction Count, Average Amount, Total Amount
- **Additional Notes:** The Excel export does not automatically format columns with exported currency or number fields. Users will need to manually format these columns for the values to display correctly.

Expense Default Coding by Cardholder

- **Description:** A detailed list of all users with default account coding. Use this report to analyze cardholders that have set up a default accounting code for expense items.
- **Input Controls:** User, Location
- **Fields:** User Name, Location Code, Employee ID, Code Type, Seg 1, Seg 2, Seg 3, Seg 4, Seg 5

Expense Fuel Usage

- **Description:** A list of all fuel transactions for the filter criteria specified in the input controls. Use this report to track and monitor all fuel-related expenses submitted by your users.
- **Input Controls:** Start Date, End Date, User, Merchant Name, Merchant State, Vehicle Number
- **Fields:** Employee ID, Name, Transaction ID, Card Number, Merchant Name, Transaction Date, Post Date, Code, Product Description, Vehicle Number, State, MCC, Quantity, Price, Total, Discount
- **Additional Notes:** The Excel export does not automatically format columns with exported currency or number fields. Users will need to manually format these

ExpenseTrack

columns for the values to display correctly.

Expense Location Activity

- **Description:** Summary by location of the amount of transactions and users with activity for the specific date range. Displays active users and total users by location and includes all transactions regardless of status. Use this report to analyze transaction activity by locations in your company.
- **Input Controls:** Start Date, End Date
- **Fields:** Location Group, Location Name, Transaction Count, Total Amount, Average Amount, User with Activity, Active Users, Total Users

Expense Policy Violation Alerts

- **Description:** A list of all transaction with violations for the date range and policy specified in the input controls. Use this report to track users with transactions that are against your company's expense policies.
- **Input Controls:** Start Date, End Date, Policy Name
- **Fields:** Policy Name, Expense Item, Transaction Date, Posting Date, User Name, Card Number, Merchant Category, Merchant Name, Transaction Amount
- **Additional Notes:** Note the following:
 - This report displays a violation only if a transaction exceeds an amount specified by your company or the mileage is changed on an expense item after it is calculated.
 - The maximum amount must be below zero for the report to pick up a violation.
 - The Card Number field will populate if the transaction originated from a Corpay Corporate Mastercard transaction and will display NULL if the transaction is reimbursable.

Expense Product Tax

- **Description:** A report of all tax collected for each expense. Use this report to view your collected expense taxes for reconciliation purposes.
- **Input Controls:** Date Type (Posted Date, Transaction Date), Start Date, End Date, User, Merchant Name, Merchant State, Vehicle Number, Location, Location Group, Product Type
- **Fields:** User Name, Card Number, Employee ID, Merchant Code, Merchant Name, State, Transaction Date, Posted Date, Product Code, Product Description, Quantity, Unit Price, Tax Collected, Tax Total, Discount, Total Amount, Transaction ID, Vehicle ID
- **Additional Notes:** The Excel export does not automatically format columns with exported currency or number fields. Users will need to manually format these columns for the values to display correctly.

Expense Spend Analysis by MCC

- **Description:** An aggregate list of transactions by merchant category code (MCC). This report breaks down the amount spent for each MCC by total amount, average amount, and percentages of the total amount. A transaction count is also included. Use this report to analyze and understand your company's spending by each MCC.
- **Input Controls:** Start Date, End Date, Manager, Users, Merchant Category Code, Locations
- **Fields:** Merchant Category Code, Amount, Average Amount, Amount Percent of Total, Transaction Count, Percent of Total
- **Additional Notes:** This report includes all transactions regardless of status. Summarizes amount spent, number of transactions, and averages by MCC and category name. The Excel export does not automatically format columns with exported percentages. Users will need to manually format these columns for the values to display correctly.

Administrator Guide

Expense Transaction Coding

- **Description:** A list of all coded transactions for the criteria specified in the input controls.
- **Input Controls:** Start Date, End Date, Transaction Type, Transaction Status, User Name, Location, Coding Status, Coding Value Filters (Type1Seg1 – Type3Seg5)
- **Fields:** User Name, Card Number, Transaction Date, Posting Date, Merchant Name, Transaction Amount, Expense Description, Transaction Status, Reviewed Date (date coded), Approver, Approver ID, Approved Date, Exported Date, MCC, MCC Description, Account Code, Customer ID, Passenger Name
- **Additional Notes:** The coding will display to reflect your accounting code configuration setup.

Expense Transaction Detail

- **Description:** A detailed report of transaction data for each expense report. Use this report as a closer view of transaction activity and the status of each transaction.
- **Input Controls:** Start Date, End Date, User Name, Item, Transaction Type (Credit, Cash, Both), Location, Location Group, Transaction Status
- **Fields:** User Name, Card Number, Transaction Date, Posting Date, Merchant Name, Transaction Amount, Expense Description, Transaction Status, Reviewed Date (date coded), Approver, Approver ID, Approved Date, Exported Date, MCC, MCC Description, Account Code, Customer ID

Expense User Information

- **Description:** A detailed list of all users within your instance of Expense Track. Use this report to analyze and track information on all of your users.
- **Input Controls:** Created Start Date, Created End Date, Manager, Status
- **Fields:** First Name, Last Name, Employee ID, User ID, User Email Address, Card Number, Location Code, Assigned Groups, Status, Manager Name, Manager Email Address, Create Date, Last Login

ExpenseTrack

Administrator Guide

Receipt Images Report

- **Description:** A detailed transaction report that displays each transaction in the selected date range as well as any attached receipt images.

Note: Do not use this report's previous version, Report with Receipt Images (Deprecated).

- **Input Controls:** Start Date, End Date, GL Code, Segment 1-15, User IDs, Locations, Location Groups, Field Split Type IDs
- **Fields:** Request #, Request Type, Expense Title, Purpose, Created For, Employee ID, Expense, Location, Address, Amount, Merchant Name, Merchant Address, Transaction ID, MCC Code, Accounts Coding Type, GL Account, Split Note, Attachment Name

Extract Expense Data

The Data Extract Utility tool allows you to set up scheduled or manual data exports as well as configure scheduled data imports. This action allows you to export expense data back to your accounting system. When a data extract is performed, two major actions occur:

- The requested data is extracted from the Expense Track system database.
- The extracted data is exported in a specified format using a chosen **delivery** method. This is sometimes also referred to as a report.

Access to the Data Extract Utility tool allows Administrators to manage all configured data exports and imports. Administrators can edit existing exports, test configurations, and add or delete exports.

Note: The following permissions are required for an Administrator to access and perform data extracts:

- **2005 – Manage Expense Reports**
- **2006 – Run Expense Reports**

ExpenseTrack

Administrator Guide

Setting up Exports

Your Corpay Account Manager can help you determine the type of expenses you want to export.

You can set the system to export expenses in one or more of the following statuses:

- Reconciled Expense Reports (default)
- Expense Drafts
- Expense Reports in Approval
- Expense Reports Pending Reconciliation

This feature is beneficial as you don't have to wait for expense reports to reach full approval before exporting them back to your ERP. When expense data is exported in one of these statuses, it is marked within Expense Track as exported. If an expense is marked as exported, but requires additional work (submission, approval, reconciliation, etc.), it can still be processed through the configured workflow, but cannot be exported again.

Note: See the following:

- Using **Expense Drafts** status will export expenses without coding at the time of export. Once the expenses have exported to your ERP, you will need to apply coding to them from within your ERP. To ensure all expenses are coded prior to export, do not use the **Expense Drafts** status.
- This applies to only credit card transactions. Reimbursable expense reports must follow approval and reconciliation before they can be exported.

ExpenseTrack

Administrator Guide

Running an Export

1. To access the Data Extracts page, select the **Settings icon** () > **System** > **Data Extracts***.

2. The Data Extracts page displays with options to run and test each data export. To manually run a data extract, click **Run** next to an extract.

| Extract Type | Extract Name | Actions |
|-----------------------|--|------------|
| AP - Manual Query | VIEWPOINT EXPORT - Group By Employee, Vendor | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Expense Report | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Company, User | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Per Transaction | Run Test * |
| Report - Manual Query | VIEWPOINT EXPORT - Group By Company, User - Report | Run Test * |

ExpenseTrack

Administrator Guide

3. If prompted to do so, select the values for each required input field per the extract configuration and then click **Run**. These fields vary depending on the set up of the extract.

VIEWPOINT EXPORT - Group By Company, User

| Input Field | Value |
|-----------------|------------|
| Start Date | 2017-07-01 |
| Invoice Date | 2017-07-31 |
| Post Start Date | 2017-07-01 |
| Post End Date | 2017-07-31 |

Run

4. A confirmation message should display with a link to view and download the exported data files.

Your report ran successfully and your results are ready for your review.

- Download report file: Baseline Product Tax.xls

5. To test a data extract, click **Test*** next to an extract.

| Extract Type | Extract Name | Actions |
|-----------------------|--|------------|
| AP - Manual Query | VIEWPOINT EXPORT - Group By Employee, Vendor | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Expense Report | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Company, User | Run Test * |
| AP - Manual Query | VIEWPOINT EXPORT - Group By Per Transaction | Run Test * |
| Report - Manual Query | VIEWPOINT EXPORT - Group By Company, User - Report | Run Test * |

ExpenseTrack

Administrator Guide

6. The same process follows and once the extract runs, you will be able to download the exported files. Testing a data extract ensures it will run as expected without actually removing any data from the Expense Track system.

Your report ran successfully and your results are ready for your review.
